

# Ride High Pineapple Transport Invention

By Jenny Woolsey

In Ride High Pineapple Issy and Tim love to skateboard. Riding a skateboard is a form of transport. Your challenge is to design a new form of transport.

- Think about what it will look like.
- How will it move?
- What type of energy will it use?
- Can it do something that other forms of transport can't do?
- Give it a name.

1) Design your transport below.

2) Label the parts, saying what they are made from and what they do.
